

Inpatient Nursing APeX Training and Practice Labs

All Inpatient, Emergency Department, Intraoperative (OR), Pre-Op/PACU, and Labor & Delivery nurses are required to complete their assigned Amplifire training curriculum. Training assignments have been issued through the UC Learning Center, and a notification email has been sent to your UCSF email address. Note that GI/Endoscopy nurses will attend instructor-led training virtually via Zoom and will receive a registration confirmation via email with important class details.

Please review the assignment email and follow the instructions to register for and complete the required modules.

Nurses without prior Epic/APeX experience must also attend a Practice Lab session to reinforce key workflows and concepts. For nurses with previous Epic/APeX experience, Practice Lab attendance is optional.

Refer to the Practice Lab schedule below for available session dates and self-registration links. After registering, you will receive a confirmation email with Zoom details and participation instructions. Please register for a practice lab as soon as possible.

For assistance with registration, training access, or course completion, please contact the APeX Training Team at apextraining@ucsf.edu.
